

# Catalina Foothills School District Health Services Program

Health Services supports and promotes student abilities to achieve the highest quality of life as understood by each individual and family. We utilize evidence-based interventions designed to mitigate the effects of adverse childhood experiences and other social determinants of health.

As public health practitioners, school nurses are aware of social needs, social determinants of health, and partner with families and other community members to reduce health disparities.

## Program Location

Health Services is comprised of eight health offices, one in each of the district school campuses, including the preschool. This Department is included under Special Services.

## Staff

Our staff includes six Health Assistants and four Registered Nurses, one of whom is also the District Health Coordinator.

## Services

Students receive daily care for health and well-being so that they are ready to put their best foot forward in the classroom.

## Our Core Values

- We protect and promote student health and facilitate optimal development in order to obtain academic success.
- We provide primary, secondary, and tertiary interventions to support individual students, groups of students, and entire school populations at a micro and macro level.
- We maintain the highest level of competency to meet the unique needs of each student.
